**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Application: 09/851,367

Examiner: to be assigned

Title: Fully Recessed Unit Equipment  
Luminaire

Group Art: 2875

Inventor: Bailey et al.

Filed: May 8, 2001

**PRELIMINARY AMENDMENT "B"**

Assistant Commissioner for Patents  
United States Patent and Trademark Office  
Washington, D.C. 20231

Dear Sir:

Please enter the following amendment prior to examination on the merits.

**In the claims**

Claim 29.(New) A recessed unit equipment luminaire, comprising:

A housing, a battery, a switching circuit, a cover having a first and a second opening, a first reflector assembly in said first opening of said cover and a second reflector assembly in said second opening of said cover, wherein said first reflector assembly has a first directional lamp and wherein said second reflector assembly has a second directional lamp, said first and said second directional lamp electrically connected to said battery through said switching circuit.

Claim 30.(New) The recessed equipment luminaire of claim 29 wherein said first and said second reflector assembly are rotateably mounted on said cover.

Claim 31.(New) The recessed equipment luminaire of claim 30 wherein each of said first and said second reflector assemblies have a central reflector section and a first

and second side reflector section, said central reflector section extending from said cover to said directional lamp, said first and second side reflector sections extending upwardly from said central reflector section to said cover opening.

Claim 32.(New) The recessed equipment luminaire of claim 31 wherein said first and second reflector assembly are semi-frustoconical.

Claim 33.(New) The recessed equipment luminaire of claim 30 wherein said first and said second reflector assembly each have a collecting reflector formed therein.

Claim 34.(New) A recessed unit equipment luminaire comprising a housing, a battery box retained in said housing, a switching circuit, a first and a second removable reflector assembly rotateably mounted on a cover attached to said housing, said first reflector assembly having a first reflector formed therein, said second reflector assembly having a second reflector retained therein, said first reflector assembly having a first lamp and said second reflector assembly having a second lamp, said first and said second lamp electrically connected to said battery by said switching circuit.

Claim 35.(New) The luminaire of claim 34 wherein said first reflector assembly has a light exit aperture and wherein said second reflector assembly has a light exit aperture, said first reflector of said first reflector assembly being frusto-conical and sloping downward from said exit aperture to said first lamp, said second reflector of said second reflector assembly being frusto-conical and sloping downward from said exit aperture to said second lamp.

Claim 36.(New) The luminaire of claim 34 wherein each of said first and said second reflector assembly has a generally concave collecting reflector extending to an

exit aperture, said collecting reflector emitting light through said exit aperture in an elongated area shape.

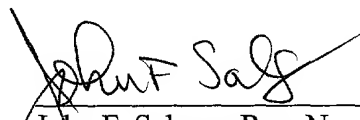

Claim 37.(New) The luminaire of claim 34 wherein said battery box is retained within an aperture in a side wall of said housing.

Claim 38.(New) The luminaire of claim 34 wherein said cover further has a peripheral outer edge designed for recess mounting of said luminaire in a wall, said cover mounted on an exterior surface of said wall, said housing, battery box and switching circuit maintained on an interior surface of said wall.

### **REMARKS**

Please enter the enclosed Preliminary Amendment "B" prior to action on the merits. After entry of the enclosed amendment, claims 1 – 15, 21 – 38 are pending in the present application.

Respectfully submitted,
